Allowable Subject Matter

1. Claims 1-27 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Applicant invention is drawn to an apparatus and method for generating audible ringing tone corresponding to the identity of the caller upon receiving an incoming call. The synthesized caller identification is retrieved from the database and mixed with musical notes to produce a mixed signal. The mixed signal is audibly outputted to the called party regarding the identity of the caller.

Prior art of record failed to teach or fairly suggest a method and apparatus for informing a user of a communications device regarding an identity of a calling party making an incoming communication event to the communications device, said method comprising: synthesizing a waveform signal indicative of at least a part of the caller's identity; ***combining the synthesized signal with a further signal indicative of one or more musical notes for providing a mixed signal; and producing an audible message indicative of the mixed signal to inform the user regarding the caller's identity.***

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. Any response to this action should be mailed to:
